High Point University

## STUDENT

Interiors By Kylie offers a look into a sustainable future of design. With a special interest in sophisticated, sustainable design- you can most definitely expect unique designs. Kylie is often inspired by colorful textiles and uniquely collected spaces. Her interest in design was peaked when she realized that re-organizing and re-decorating her room every other day could be turned into a career! This not only opened her eyes to everyone's favorite HGTV but allowed her to seek schools specializing in Interior Design. As a design student, Kylie has worked for Flexsteel & Sherrill Furniture as a designer's assistant & sales associate. Her favorite kinds of projects to work on thus far have been Contract Design projects- but with that being said, there is so much more territory to be discovered. High Point University has completely opened up her world to design professionals & given her opportunities that no other place could offer!
